About Rosie

“I am passionate about my work with children and have been qualified for almost 30 years. When you come to my clinic, I am the person who will assess your child and with your input will plan a therapy programme to improve their communication. If there is a need to involve day carers, teachers or grandmas, I will happily do so. My therapy approach is game-based as I believe that children only learn when they are having lots of fun and a good laugh. Along with my fish “Fillet, Chips and Rod”, I will watch over your child’s progress during therapy with great care”. Rosie
